

SMS Playbook

How to send better, smarter, more integrated SMS messages.

INTRO

With massive engagement and open rates — and the fact that just about every phone in the world can receive text messages — SMS is a channel marketers can't afford to ignore.

However, many marketers shy away from SMS — or don't use it to its full potential.

In this playbook, we'll show you some of the ways you can use SMS to create deeper connections with customers — and better integrate text messaging into your overall customer engagement strategy.

Whether you're still considering SMS, just getting started or looking for ways to expand your use of the channel, consider this an inspiration guide for making your SMS marketing even more valuable for your customers and your brand.

BENEFITS OF SMS MARKETING

Why is SMS such a great channel? Among many other reasons, it's got astronomical engagement:

90%

*of text messages are read
within 3 minutes*

98%

open rate for SMS texts

No other channel can touch it.

It's also one of only two engagement channels that allow you to communicate directly with your audience on mobile, without an app. (Stumped? The other one is [Mobile Wallet](#), which you should also definitely be exploring.)

That makes SMS a channel you can't afford to ignore.

SMS FOR TRANSACTIONAL MESSAGING

Make transactional messages more visible and useful —
or respond to a user request through your preference center
to send transactional messages via SMS.

SMS FOR TRANSACTIONAL MESSAGING

Transaction Confirmation:

Make it easy to see when an order has been received and when it's been shipped, and provide tracking information at their fingertips.

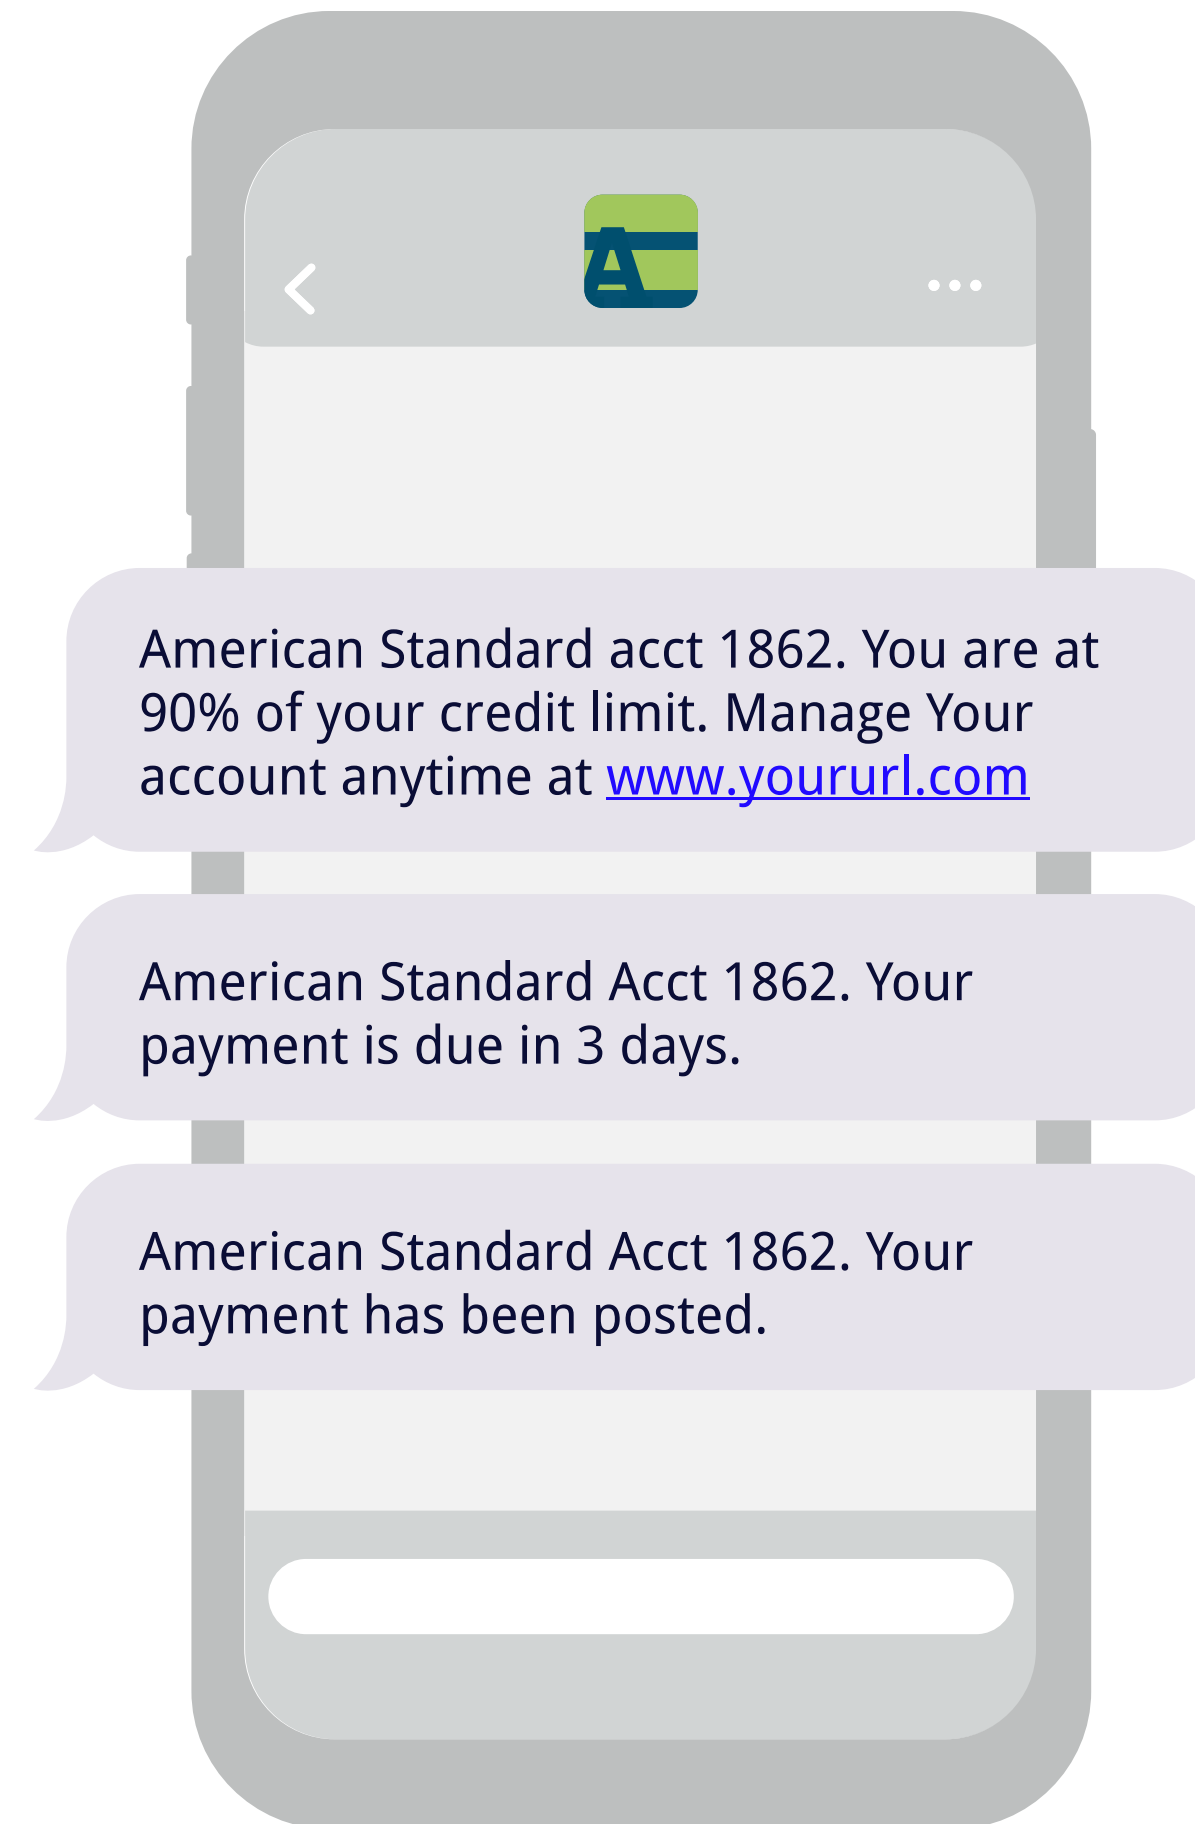

SMS FOR TRANSACTIONAL MESSAGING

Alerts:

Put mission-critical information front and center on your customers' phones.

Deposit & balance.

Claim reports received & updates.

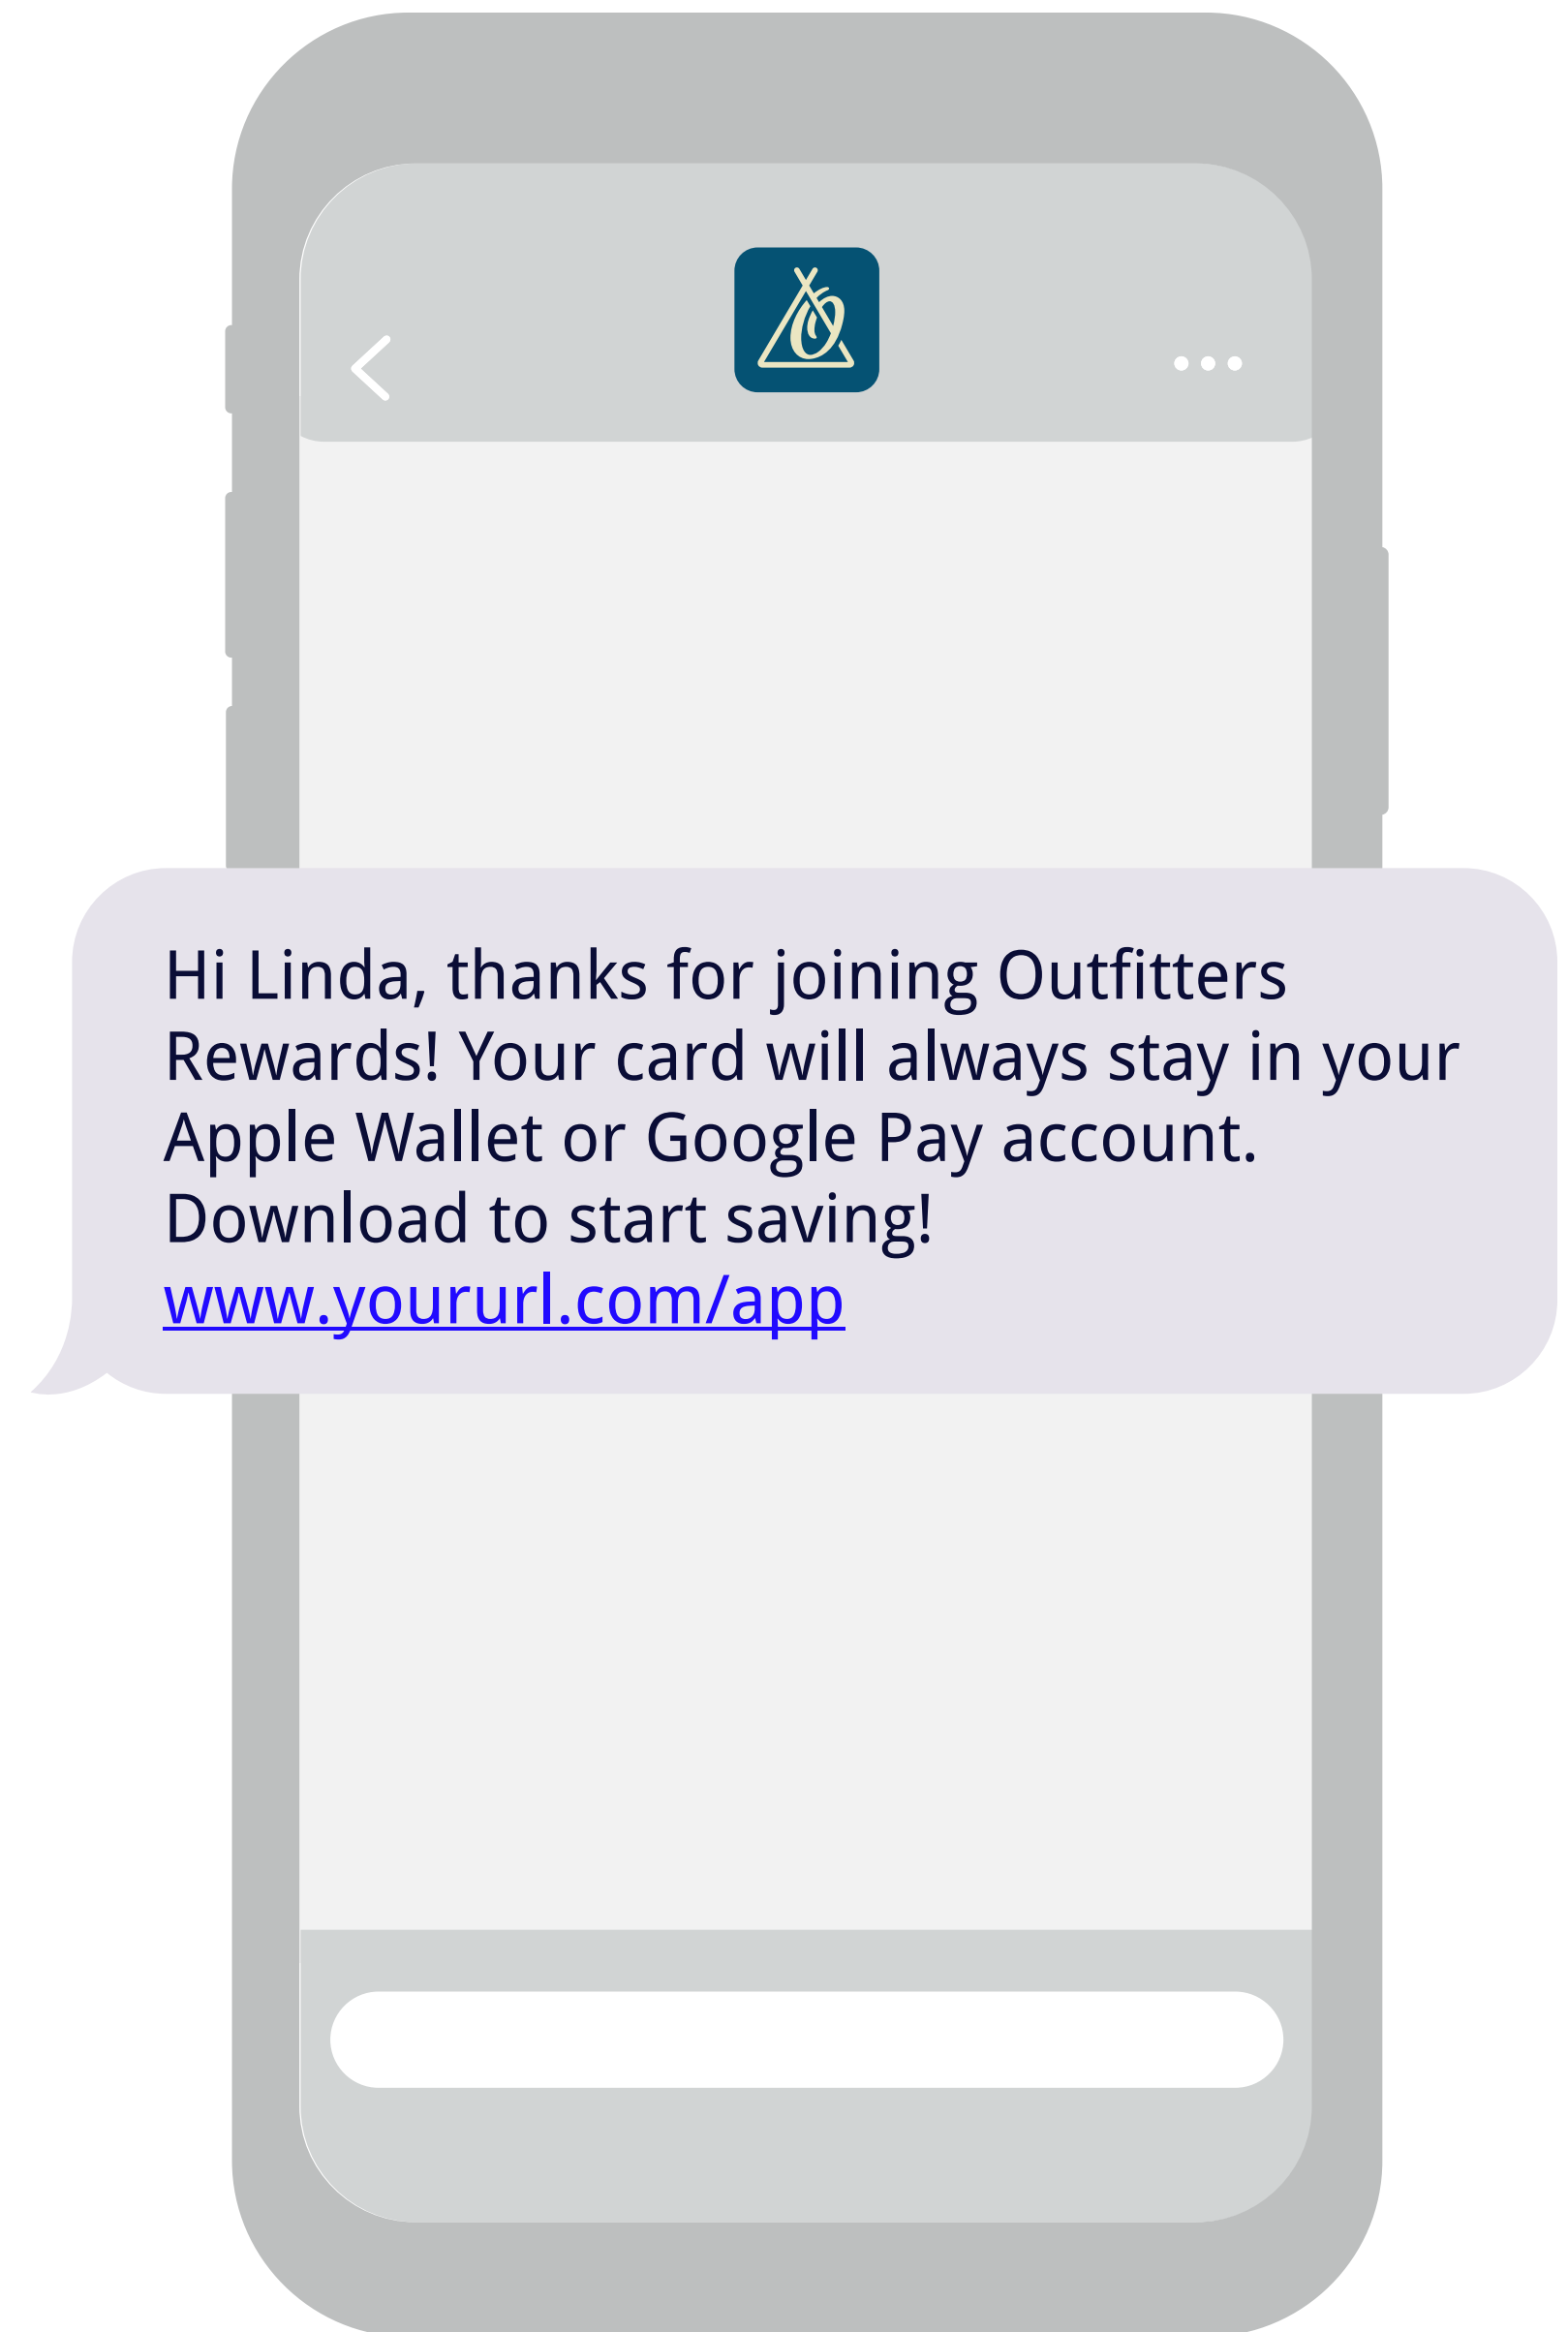

SMS AND MOBILE WALLET

Some things are just better together, like SMS and mobile wallet. Using SMS' wide reach with the convenience of mobile wallet creates a powerful combo for engagement.

SMS AND MOBILE WALLET

Loyalty Card Delivery:

Make it easier than ever for your customers to get your loyalty card in their mobile wallet.

SMS AND MOBILE WALLET

Coupon Delivery:

Boarding Pass Delivery:

Create an amazing day of travel experience — that doesn't depend on a wifi connection — by sending a mobile wallet ticket via SMS.

SMS IN MULTI-CHANNEL ENGAGEMENT

In a recent poll we ran, marketers said one of the key reasons they're hesitant to use SMS is fear of over-messaging customers.

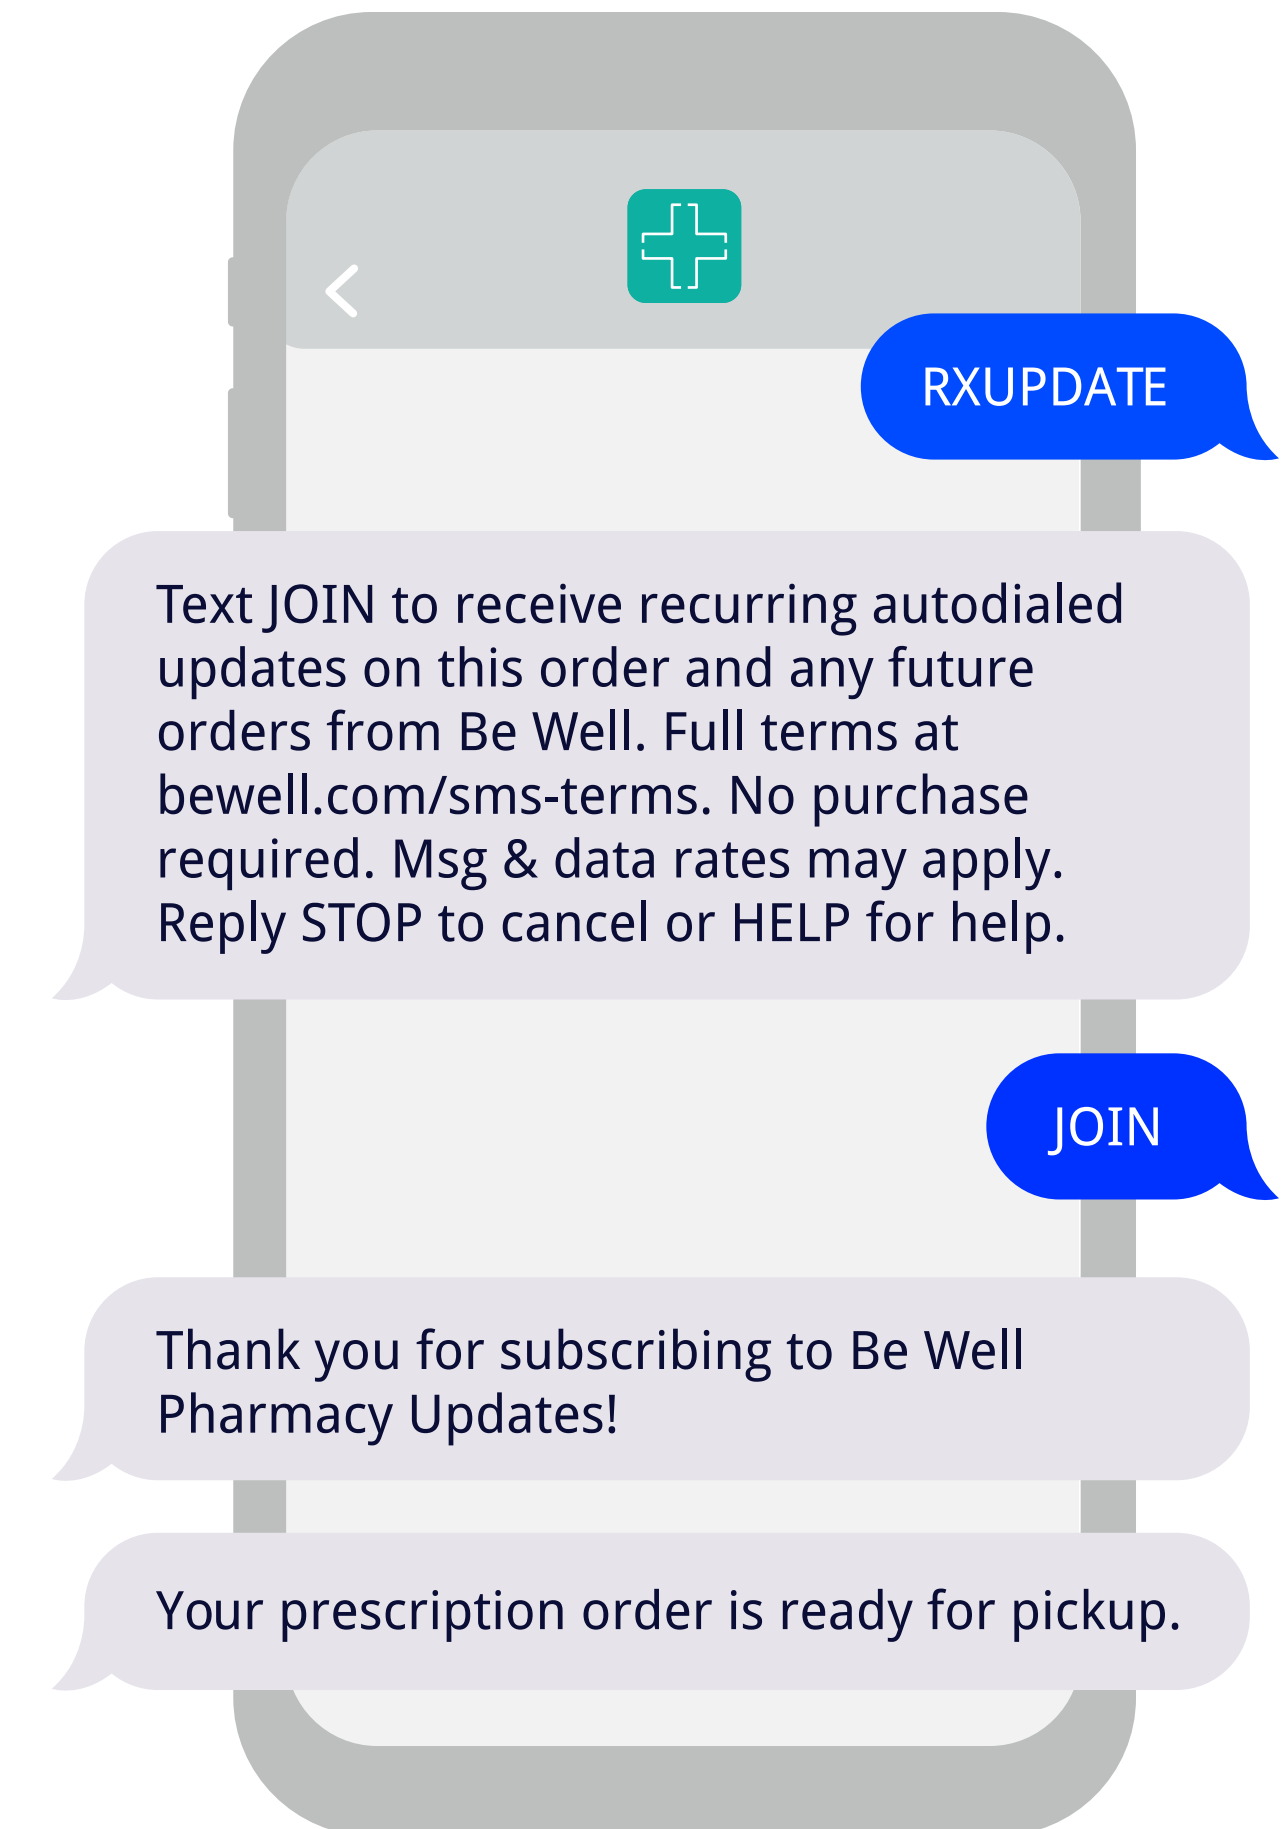

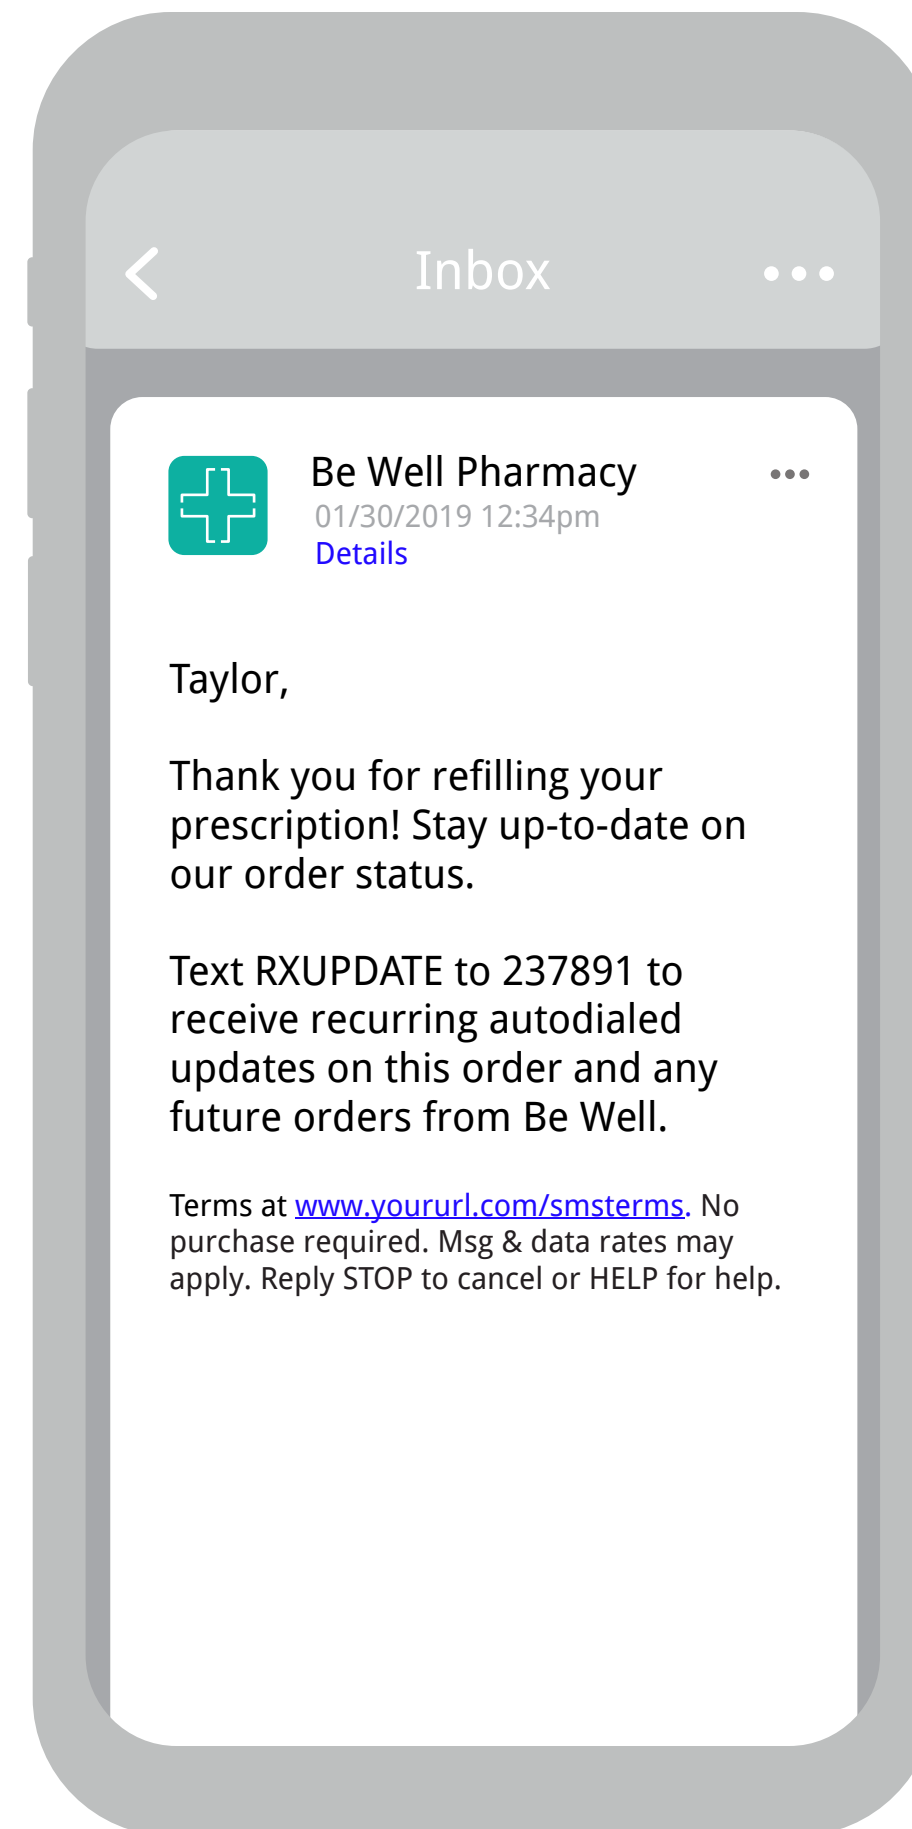

We agree: pinging your customers too often is a horrible, terrible, no good very bad way to earn trust, loyalty and drive long-term value.

That's why we've created smart ways to orchestrate messaging across all your customer engagement channels, so you can use the best mix of channels for messaging — instead of blasting customers on every channel every time.

SMS IN MULTI-CHANNEL ENGAGEMENT

Email + SMS for Transactional Notifications

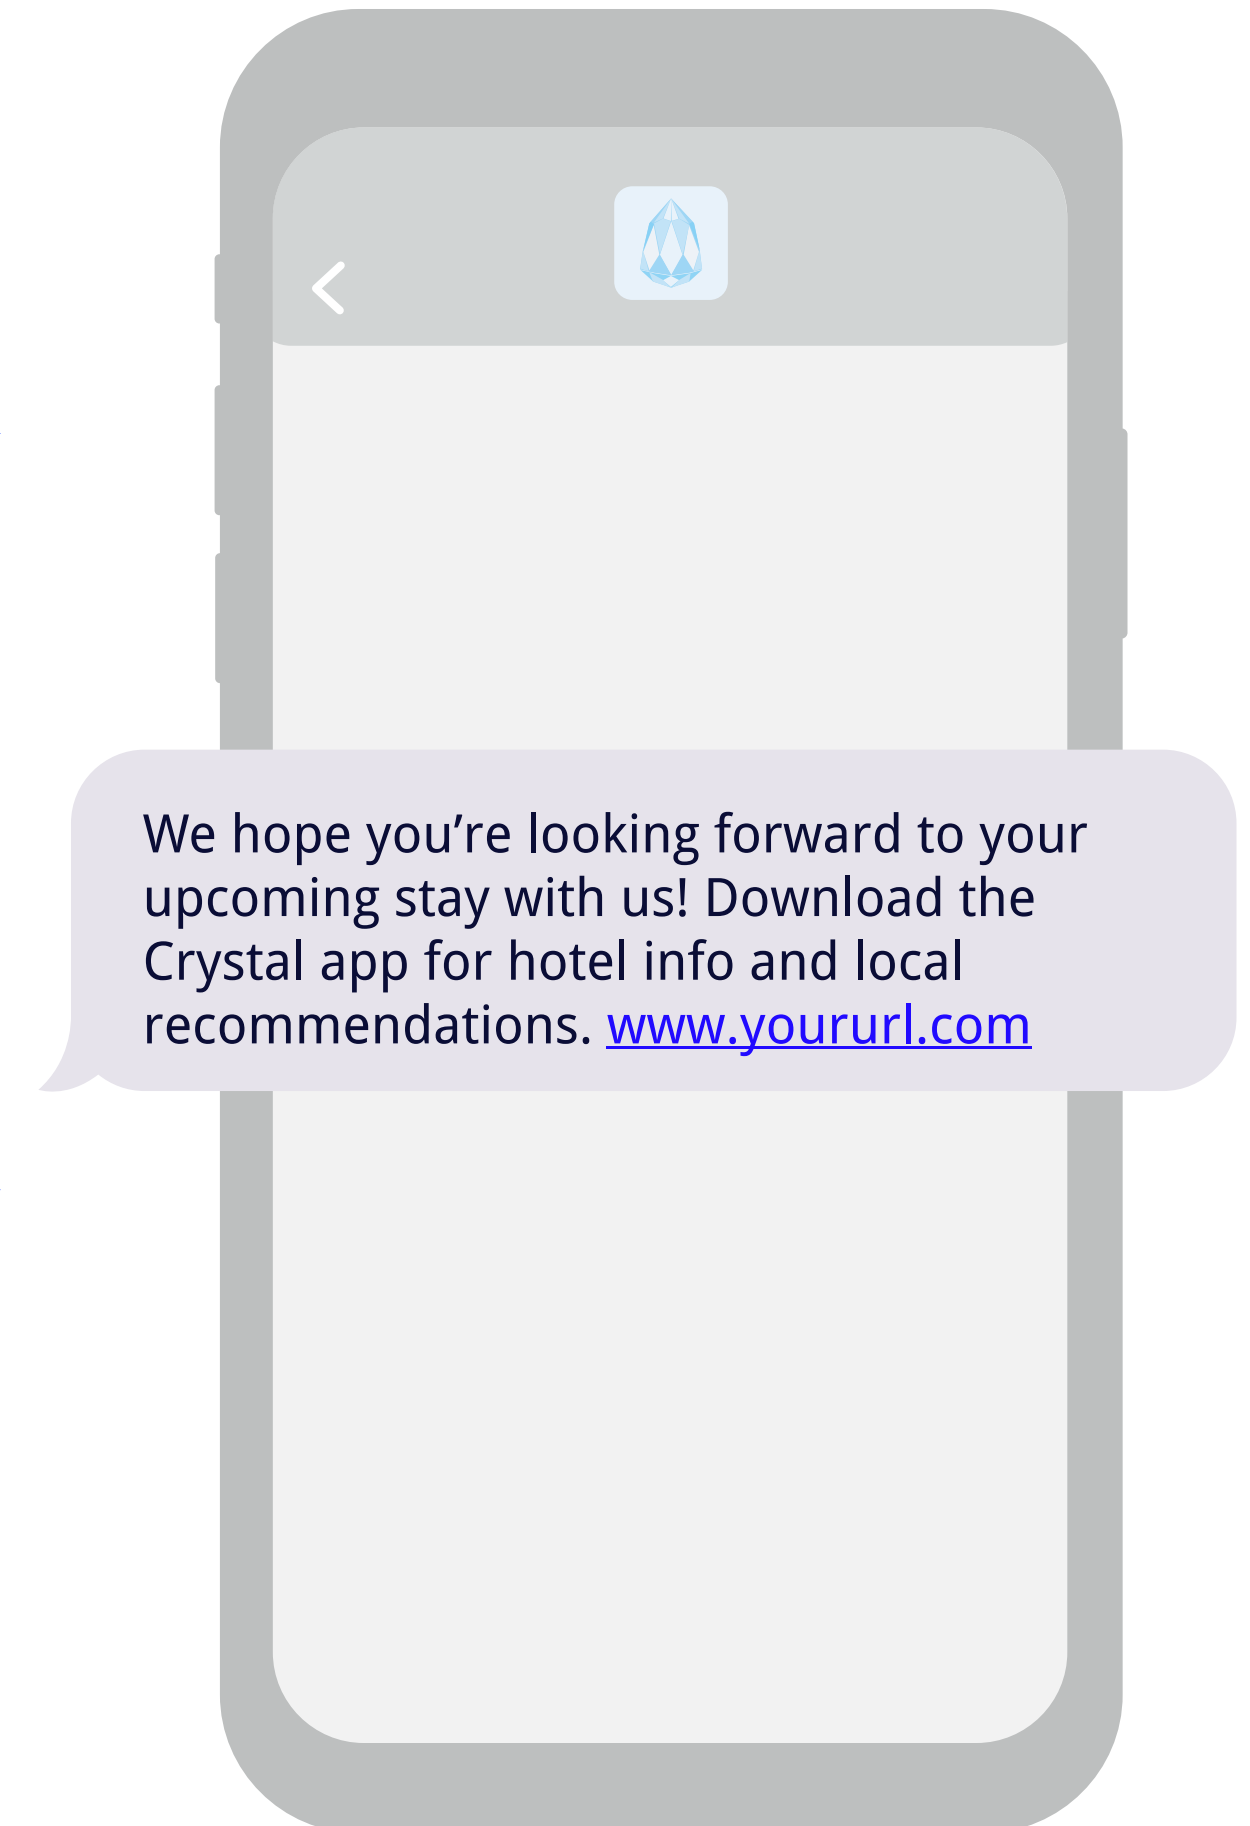

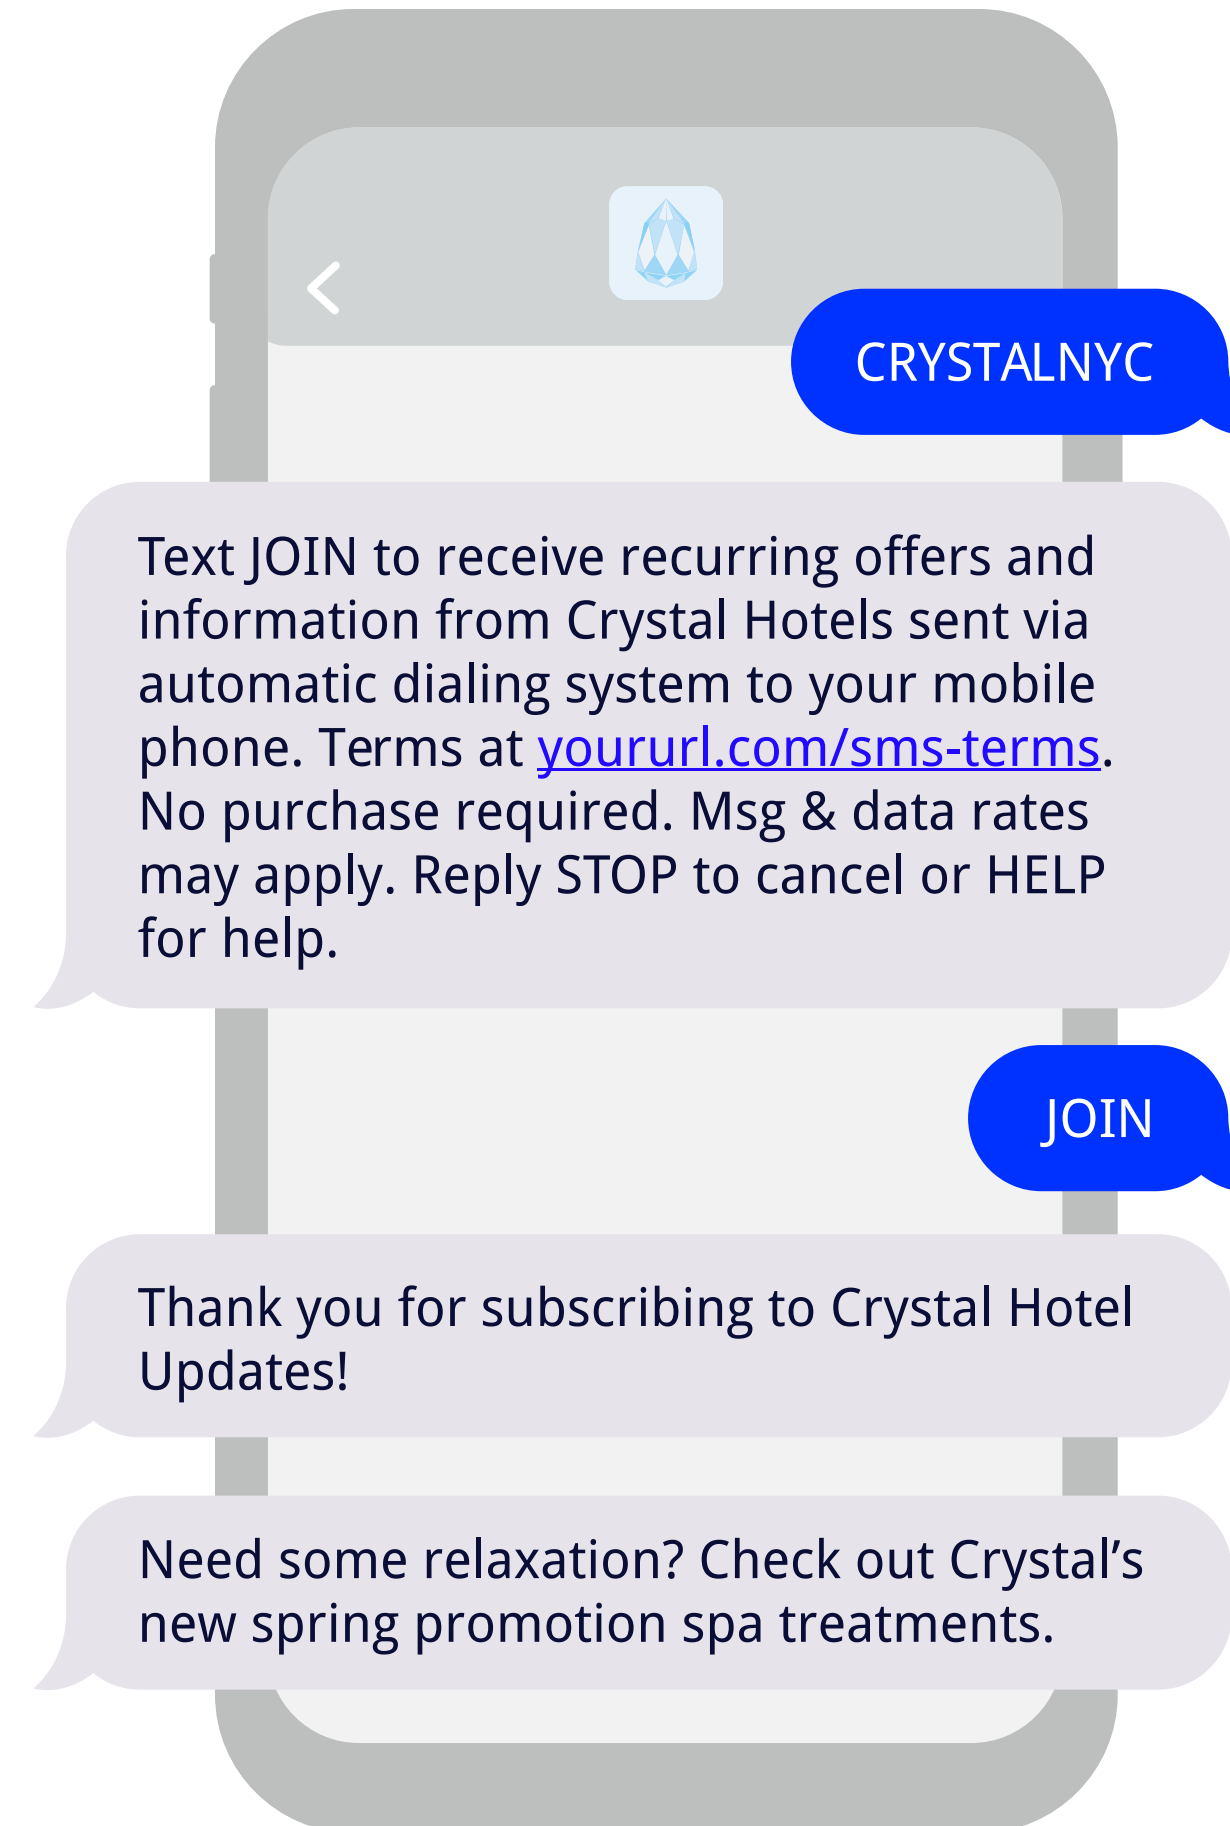

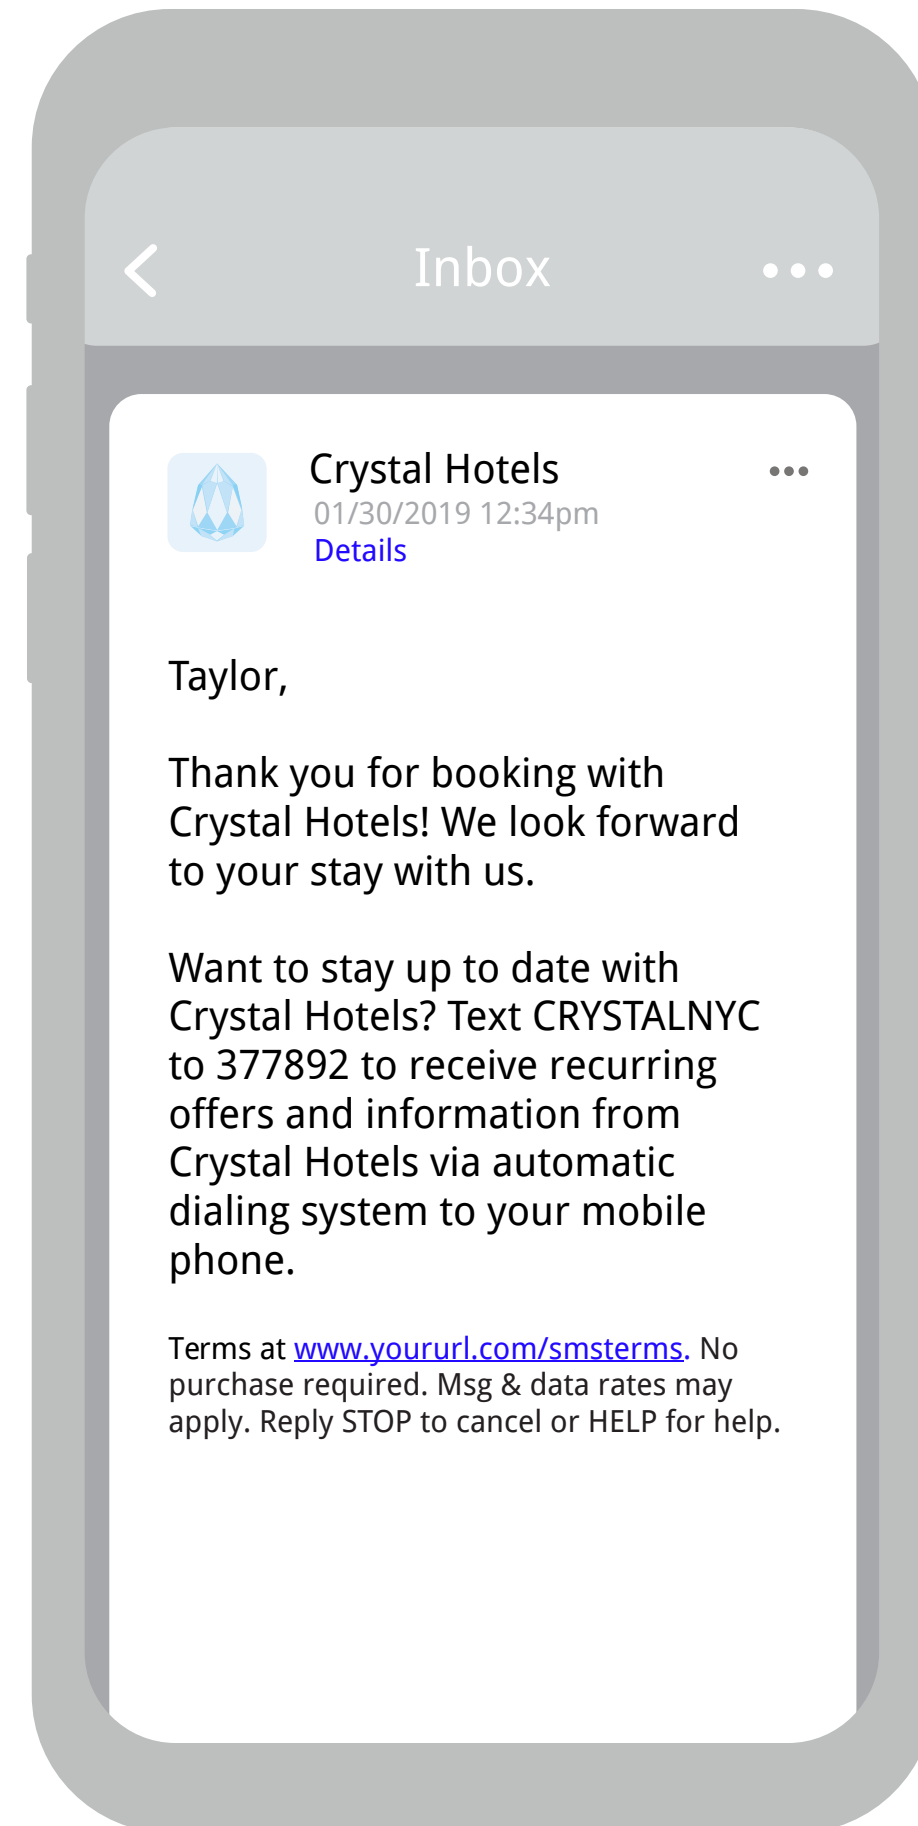

Make sure customers are getting critical updates on all the channels they want to receive them on. Send an SMS opt-in offer via email to give them maximum flexibility.

SMS IN MULTI-CHANNEL ENGAGEMENT

Email + SMS For Expanding Engagement Channels:

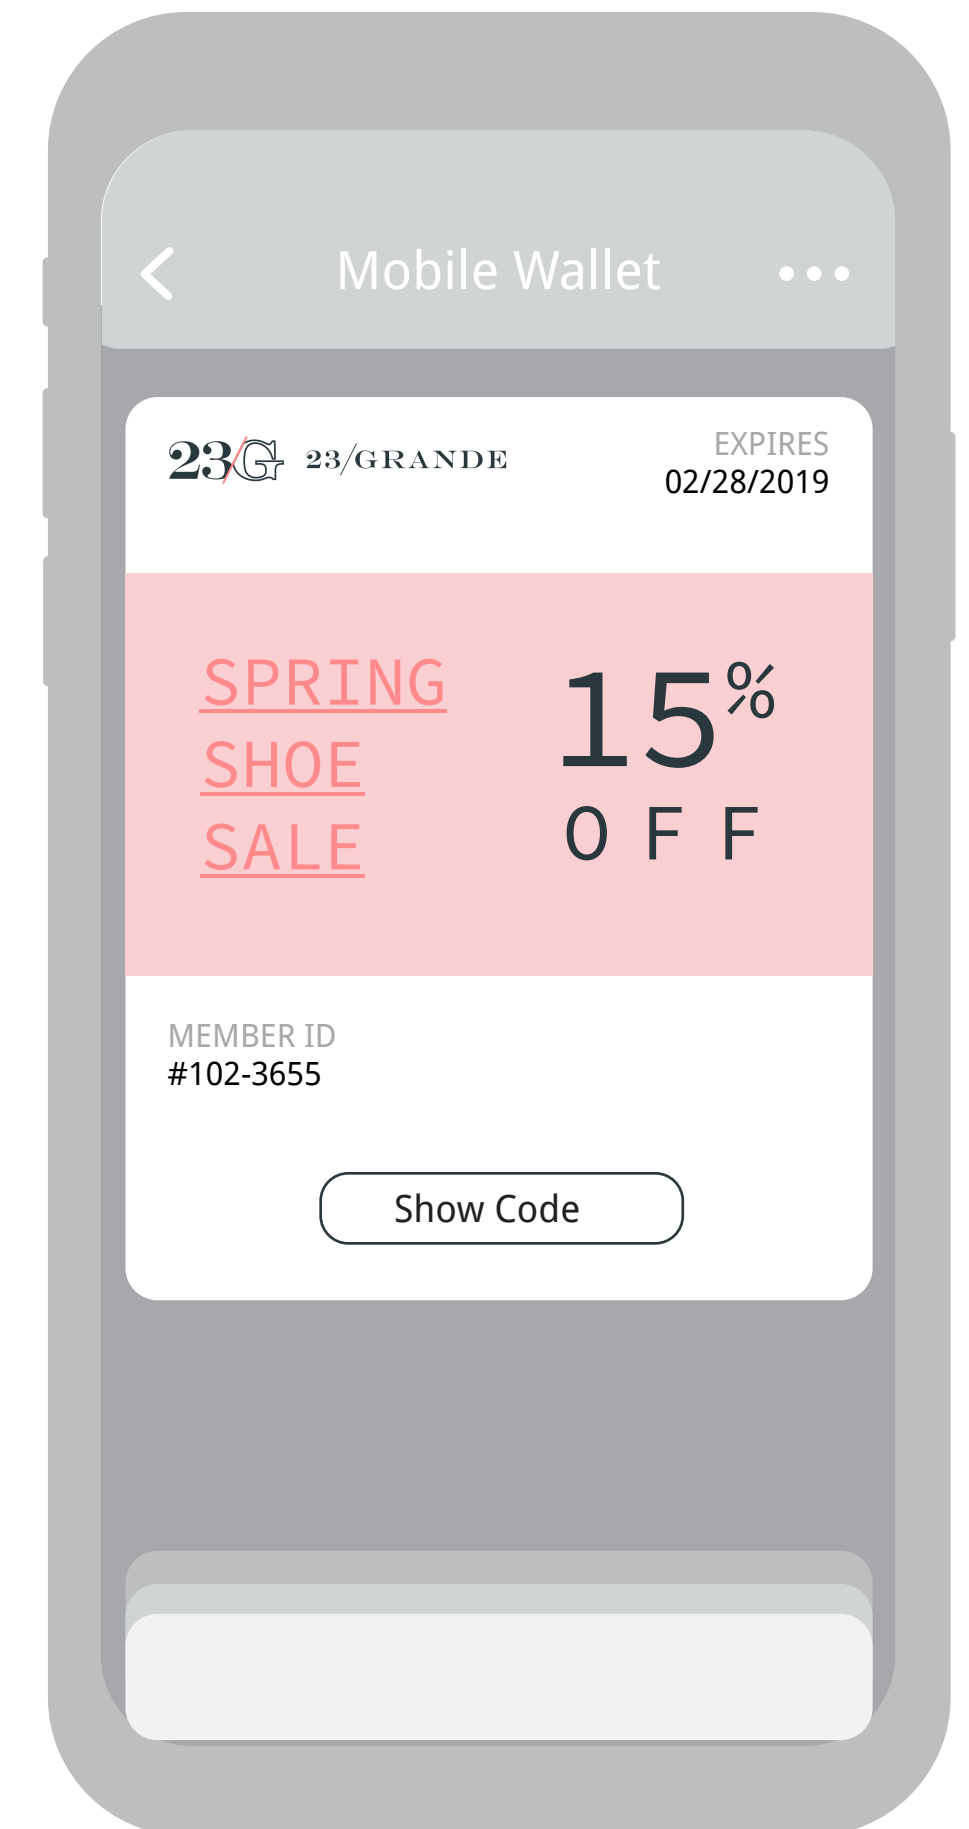

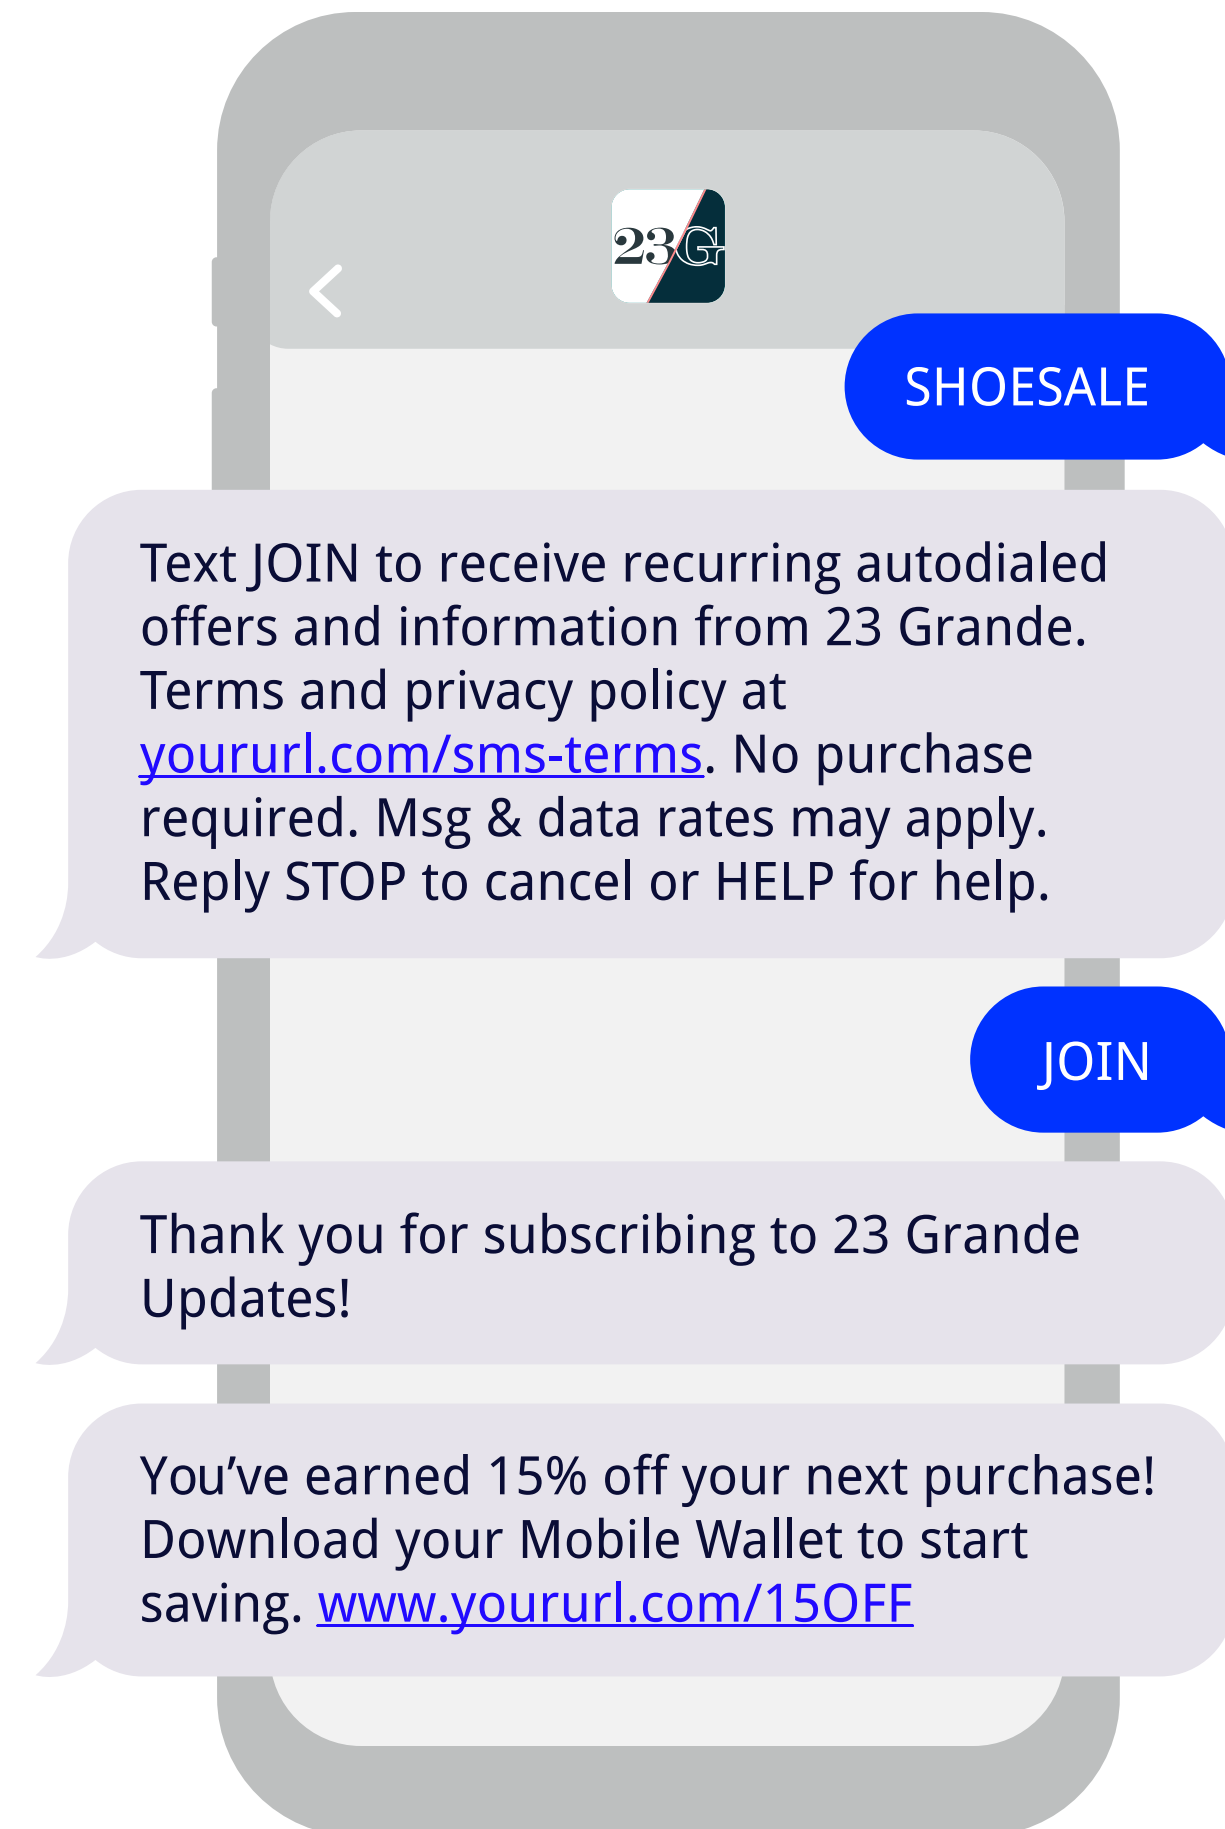

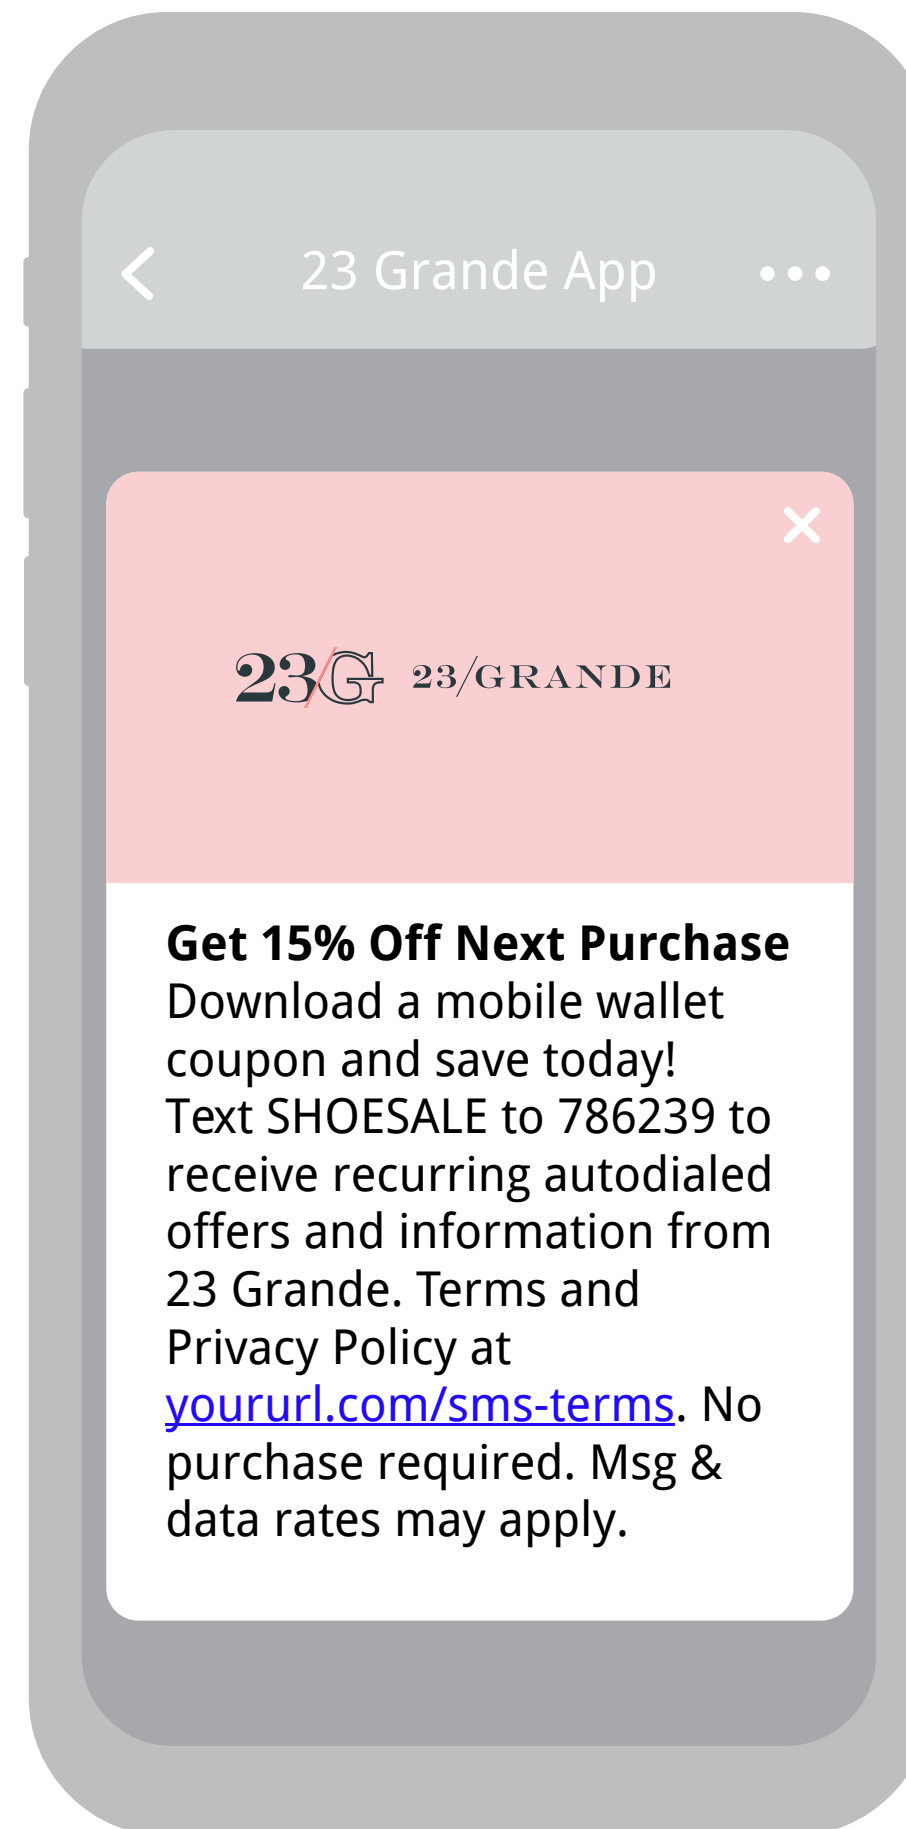

The more options you have for messaging users directly the better. Use email to promote a “text club” messaging channel - and identify your most loyal customers.

SMS IN MULTI-CHANNEL ENGAGEMENT

In-App Message + SMS + Mobile wallet:

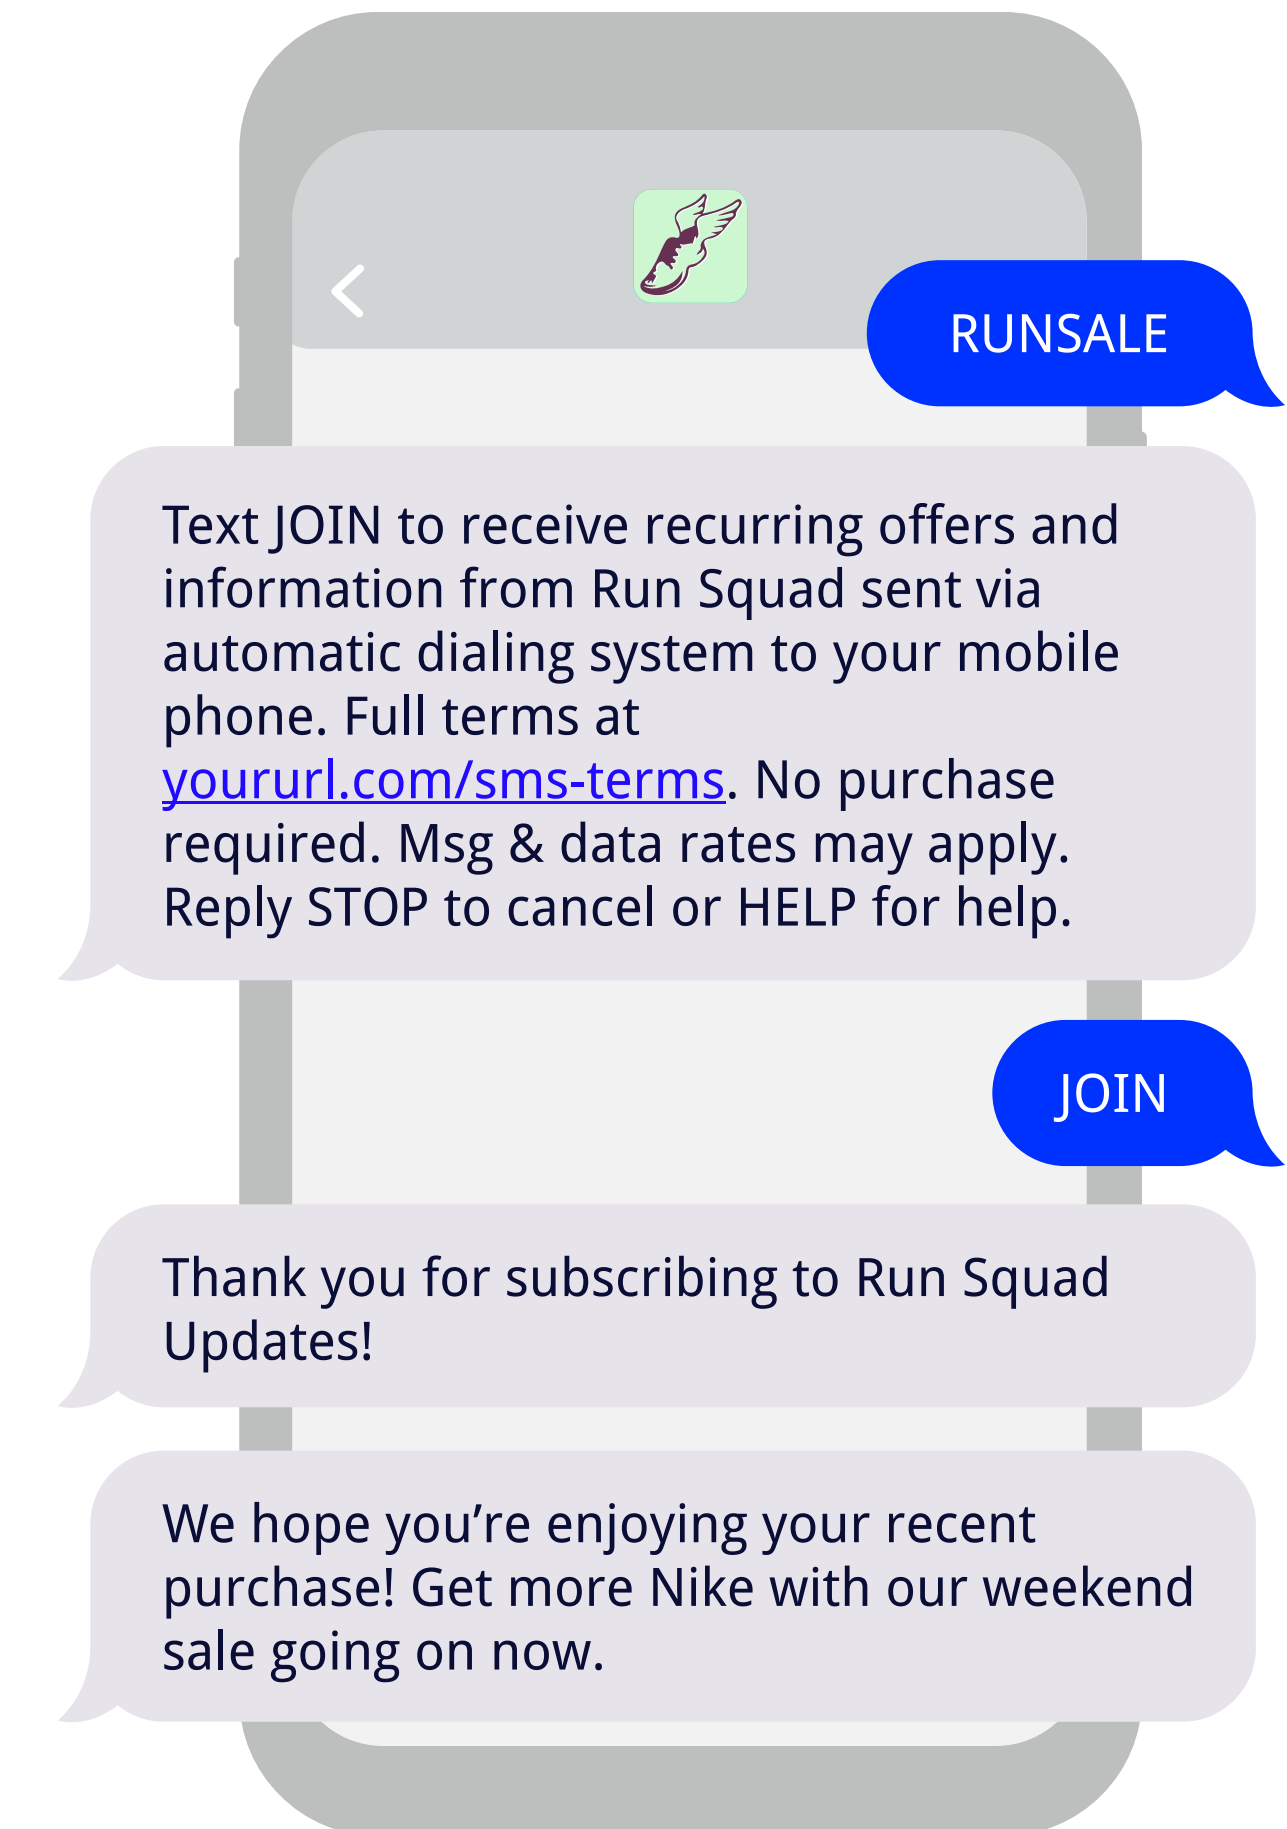

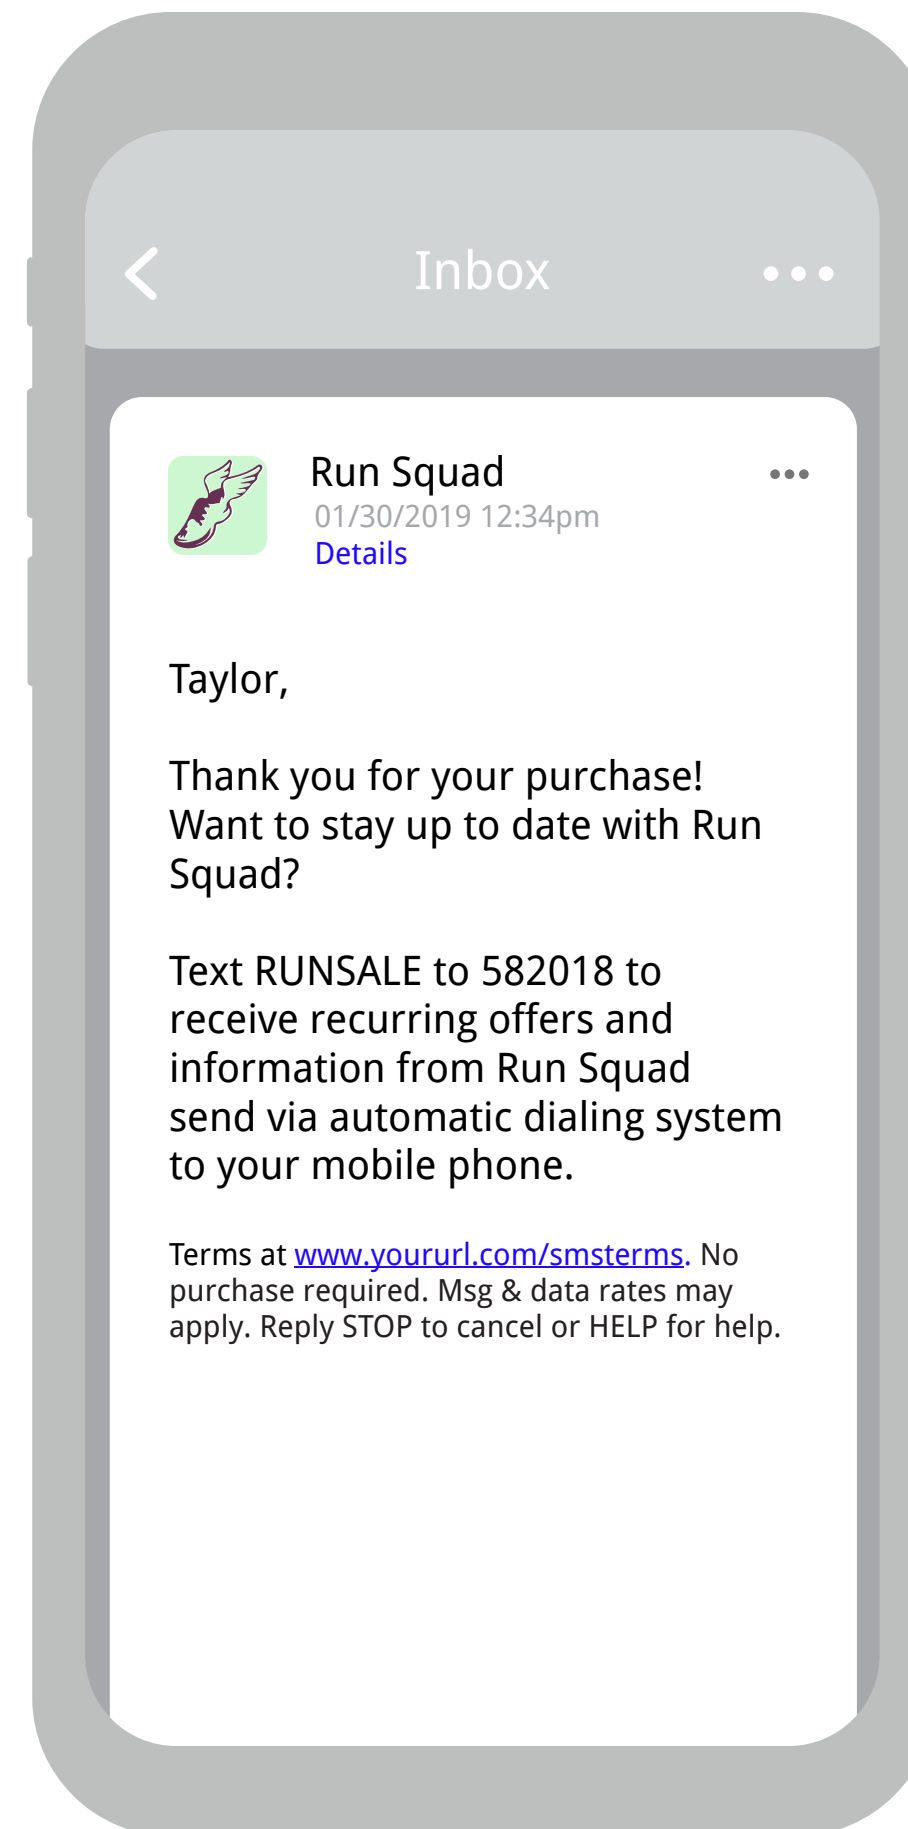

Provide an incentive
to expand to two new
channels: SMS and Mobile
Wallet. It's a win/win...

SMS IN MULTI-CHANNEL ENGAGEMENT

Email + SMS for Upsell:

Use an email to point users to opt into your text marketing program — then quickly show them how valuable it will be by providing them a personalized coupon via SMS that pivots off a purchase they've already made.
